Original

PETITION TO THE GARRETT COUNTY COMMISSIONERS

A wind farm is projected for the 4-mile Ridge in Garrett County as soon as and if approved by the commission and Garrett County residents. There are currently no houses within a ½ -mile radius of this property and therefore infringement upon the well being of nearby residents can be avoided. This projects' approval would lay the groundwork for a definitive **environmental awareness** in Garrett County and also support our most important industries, including healthcare and education, with **extra tax dollars**. By signing this document I am in **favor of the project** and I am a voter in Garrett County.
