

Remediation: Next Steps

How to choose a project?

- Project Specifics
- Project Impact
- Project Complexity
- Project Cost

Project Specifics

- Where is the project located? Residential vs commercial vs agricultural
- What is the size of the project area?
- What is the nature of the problem to be addressed? A culvert issue? A overland flow issue? A nuisance or safety issue?
- How can the problem be addressed? What are the specifics of the suggested remediation?

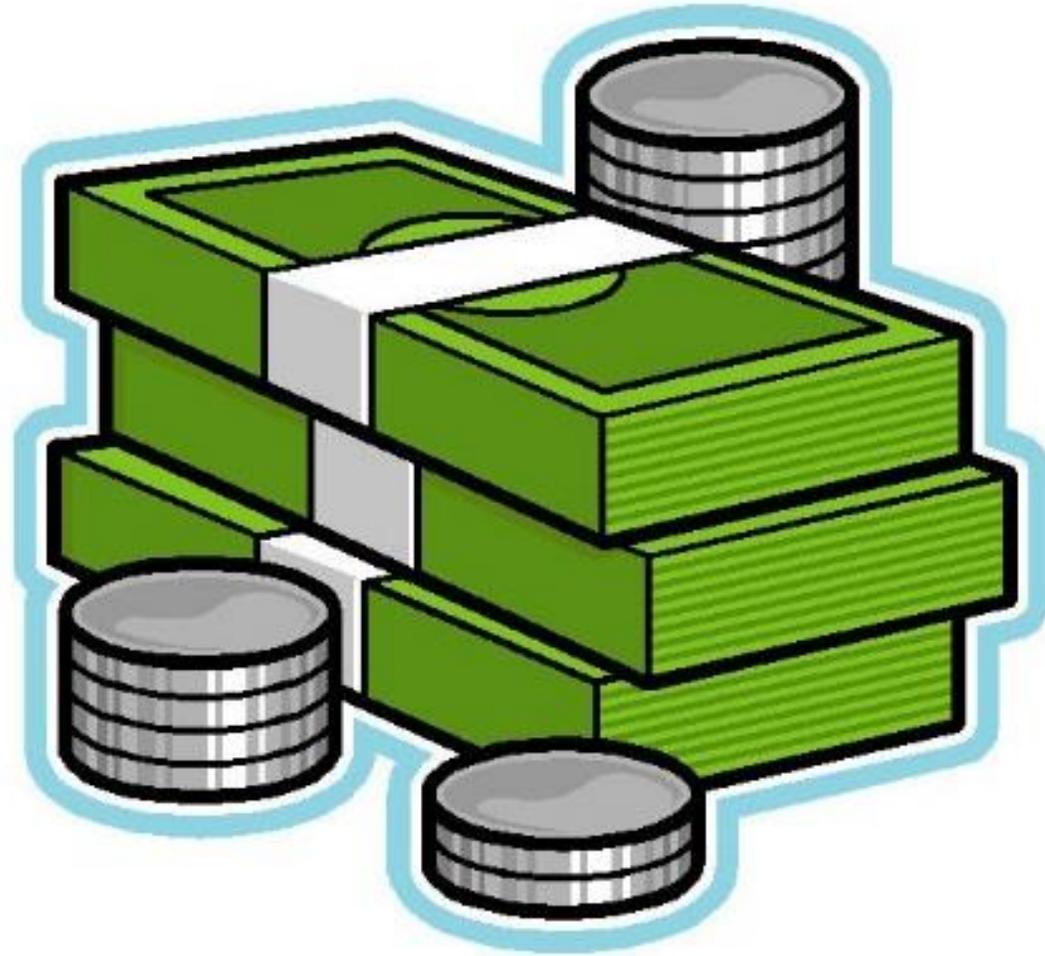

Project Impact

- Number of affected stakeholders
- Quantity vs Quality
- Severity of the issue

Project Complexity

- Are there right-of-way issues?
- Will the project involve outside stakeholders (ie. state or federal permits)?
- Will the project involve HOAs or a group of homeowners?
- Does the project require construction of infrastructure?

Project Cost

Conclusion

- Prioritize the potential projects
 - Organize stakeholder meetings
 - Attain funding
 - Etc...
-
- Each site is likely to require a different set of next steps
