Notes: **Purvis Brothers** – The delivered price of fuel will be the price on the day the fuel is loaded at the terminal, not the day the fuel is quoted. Standard delivery costs are based on a full trailer load of product (800 gal 100LL/7500 gal Jet A). If less than full trailer loads are ordered, the delivery costs would be proportionally higher on a per gallon basis. Split loads are readily available. Fuel surcharges are expressed as a % of the freight component at the markup, currently 15%. The % change is adjusted according to diesel averages and reflects 1% for each 10 cents or fraction thereof.
