

Deep Creek Lake Dredging Evaluation WEBINAR

Garrett County's contractors have performed a dredging evaluation to determine the most cost effective and environmentally and publicly acceptable location from which to dredge sediment from Deep Creek Lake. Ten lake coves have been identified as priority study areas: Arrowhead Cove, Harvey's Cove, Poland Run Cove, Green Glade Cove, Hazelhurst Cove, Turkey Neck Cove, Chadderton School Cove, Deep Creek Cove, Penn Cove, and Pawn Run Cove.

This webinar will review the following: potential funding options for potential dredging design and construction, previous studies performed, dredging methods, the evaluation process and results, estimated dredging costs, and next steps. The webinar will be followed by a question and answer period.

No time? NO WORRIES! The webinar will be recorded and posted on Garrett County's website for your use. Questions can be submitted during or after the webinar.
