

## **Grading Permit Application Information**

*The following items are applicable for a new home permit. This form should be used as a guide to determine if a grading permit will be required. If the planned grading appears to be close to the thresholds stated below, the Garrett County Permits and Inspections Office will determine if a permit is needed.*

Applicant Name: \_\_\_\_\_ Location of Project: \_\_\_\_\_  
Excavator: \_\_\_\_\_ Engineer/  
Plan Prepper: \_\_\_\_\_

### **Determine Impervious Area**

*(Impervious area greater than 5,000 sq. ft will require a Grading Permit with a Stormwater Management Plan.)*

Proposed House/Addition: Dimensions \_\_\_\_\_ Area \_\_\_\_\_ sq. ft  
Proposed Decks/Porches: Dimensions \_\_\_\_\_ Area \_\_\_\_\_ sq. ft  
Proposed Driveway: Dimensions \_\_\_\_\_ Area \_\_\_\_\_ sq. ft  
Proposed Parking: (No. of Bedrooms \_\_\_\_\_ multiplied by 360) Area \_\_\_\_\_ sq. ft  
Any other Proposed Impervious: Dimensions \_\_\_\_\_ Area \_\_\_\_\_ sq. ft  
Total Proposed Impervious: \_\_\_\_\_ sq. ft

### **Determine Earth Disturbance**

*(Earth Disturbance greater than 5,000 sq. ft OR 100 cu. yds will require a Grading Permit with an Erosion and Sediment Control Plan.)*

#### ***Area of Disturbance***

This will include all of the impervious area plus the space required for equipment and staging. Below is a good estimate to provide ~ 5 ft to work around the proposed improvements. The estimate can be determined another way, but additional calculations/drawings must be included to support the estimate.

Total Proposed Impervious \_\_\_\_\_ multiplied by 2 Area \_\_\_\_\_ sq. ft  
Any Grading/Clearing Planned Outside of the Impervious Footprint?  
(Ex. removing additional trees, re-grading the yard) Area \_\_\_\_\_ sq. ft  
Total Proposed Area of Disturbance: \_\_\_\_\_ sq. ft

#### ***Volume of Excavation***

Will there be a full basement? Is it going to be a walk out?  
Will any cut/fill be needed to level the driveway, yard, etc.?

Proposed Cut: Volume \_\_\_\_\_ cu. yds  
Proposed Fill: Volume \_\_\_\_\_ cu. yds  
Total Proposed Excavation Volume: \_\_\_\_\_ cu. yds
